

PEDIATRIC NEUROPSYCHOLOGIST POSITION:

CHOC Children's Hospital in Orange County, California is pleased to announce a full-time Pediatric Neuropsychologist position (pending final funding) in our rapidly growing Department of Psychology serving a culturally and medically diverse population of children throughout the CHOC system of care. Responsibilities will include comprehensive outpatient neuropsychological testing for school-age children (though early childhood experience would be beneficial) and communication of evaluation results with families and other CHOC providers. The ideal candidate is expected to have experience with a collaborative care model, and strong interpersonal skills are essential. Also, given the diverse populations served in the region, applicants with bi-lingual testing capabilities would be well-suited to this position.

Neuropsychology is a highly valued specialty within CHOC, and we enjoy a broad source of referrals from specialties including but not limited to Neurosciences (neurology and neurosurgery), Oncology, Cardiology, Genetics, Hematology and Metabolics and Neurometabolics. Of particular distinction is CHOC Children's Hospital Level 4 Epilepsy Center, which provides comprehensive medical, neuropsychological, and neurosurgical management for a range of epilepsy patients. The successful candidate would have the opportunity to work closely with one of our medical teams to develop a comprehensive approach to neuropsychological evaluation. Additional opportunities for growth are available and program development is strongly supported and encouraged.

CHOC Children's has a well-established training program and the position will include teaching and supervision opportunities within our APA accredited doctoral internship, as well as our postdoctoral fellowship and pre-doctoral practicum programs. There also are opportunities for conducting research and community outreach depending on the successful applicant's interests.

Completion of an APA or CPA accredited doctoral program (clinical, counseling, or school) and an APA or CPA accredited internship are required. Formal fellowship in pediatric neuropsychology conforming to Houston Conference guidelines is strongly preferred. Board certification is highly valued within the Psychology Department at CHOC Children's, and the successful candidate should anticipate support and guidance in the attainment of board certification in neuropsychology. Candidates must be licensed or license eligible in the State of California.

CHOC Children's is an affirmative action/equal opportunity employer. Candidates from minority and diverse cultural backgrounds are encouraged to apply; salary and benefits are competitive. Applications will be accepted until the position is filled. Please send a letter of interest, CV, and three references to: Jonathan Romain, Ph.D., ABPP
Department of Pediatric Psychology, CHOC Children's Hospital, 1201 W. La Veta, Orange, CA 92868. Contact Jonathan E. Romain, Ph.D., ABPP at JRomain@choc.org with any questions. Electronic submission of applications is preferred.
